Lead Software Developer C#/.NET (Product Development)

Position Summary:

Design state-of-the-art medical devices in an exciting and fast-paced development environment.

You will work with other product developers, product managers, and other team members to develop software applications to interface with our medical equipment. You will work with other engineers and be focused on software design, requirements and execution to ensure successful product release and deployment.

Requirements:

- History of product development experience.
- >6 years experience software development.
- Programming experience in C#/.NET. Good debug and bug fix skills.
- Knowledge of software development life cycle and project management concepts and good task management skills.
- Highly motivated and excellent problem-solving skills.
- BS degree in Computer Science or equivalent.

Come play a leading role in the growth of Cadwell Laboratories, Inc., a world-renowned medical equipment leader. Join Cadwell and be a part of the team that makes ideas come to life!
