SCALABLE HARDWARE AND SOFTWARE

Build the system you need with a variety of stimulators, amplifiers, and test protocols.

- Our most advanced amplifiers offer 1-12 channels of sophisticated filtering and noise reduction.
- Choose from a variety of carts, computers, and monitors or provide your own.
- Configure a portable Summit™ system that can be set up for testing in a matter of seconds.

FLEXIBLE AND FAMILIAR DESIGN

- **See it how you want to**: Custom views give you full control of displays, colors, tables, and test protocols.
- **Hear it how you want to**: Our highest sound quality is achieved with instantaneous signal processing, dual high-quality speakers, and full equalizer controls.
- **Use it how you want to**: Customize your workflow with user-defined studies and tests that can be adjusted on the fly.

INNOVATIVE INTERFACE

**StimTroller Plus™ for NCS**

- Perform an entire NCS from the palm of your hand.
- Control intensity, pulse width, distance, nerve selection, site selection, trace selection, and more.

**StimTroller Plus™ for EMG**

- Control gain, sweep, run/stop, playback, and volume controls exactly where you need them - right next to your needle.

**Precise and responsive controls**

- Simplified interface with programmable protocol-specific function keys and knobs.
The Sierra® Summit™ is designed for the electromyographer who prioritizes reliability and durability. Passion, experience and focus are the building blocks of Cadwell’s most advanced and innovative electrodiagnostic system.

**REDUCE TESTING TIME**
- Perform any NCS using only the StimTroller Plus™ controls.
- Reduce interpretation time with real-time comparisons and Tabular Data Summary View.
- Eliminate the need to report a summary of findings with auto findings composer with custom phrasing.
- Create a personalized report with just a few mouse clicks using QuickReport™ and custom templates.

**IMPROVE WORKFLOW**
- Synchronized Patient Database includes all studies, reports, and other associated documentation.
- Fail-safe storage and Auto Archiving.
- Multiple EMR interface options include auto PDF export, HL7 ADT, and ORM orders inbound and results outbound.
- User management with user-specific system setup, user roles, and single log-in with Active Directory integration.

**MAXIMIZE CLINICAL INFORMATION**
Seamlessly transition from a standard muscle screen to a detailed investigation without adding time or complexity.
- Simple on-screen controls and settings can be changed on the fly.
- Simultaneously display data in multiple formats to maximize extraction of clinical information and reduce study time.
- Hands-free MUP triggering, Multi-MUP analysis, turns/amplitude analysis, and real-time interference pattern analysis.
- Get immediate quantified results compared with published normals.

**STREAMLINED PROTOCOLS**
Cadwell puts great effort into reducing examination time, minimizing patient discomfort, and providing a simple interface. Our latest SFEMG+ protocol gives you hands-free recording, automatic peak detection and triggering, real-time analysis with live results, and normative data for standard concentric needles. You can exclude traces and refine your results in seconds.
